

1.1.3 Area of Square - Algorithm, Flowchart and Code

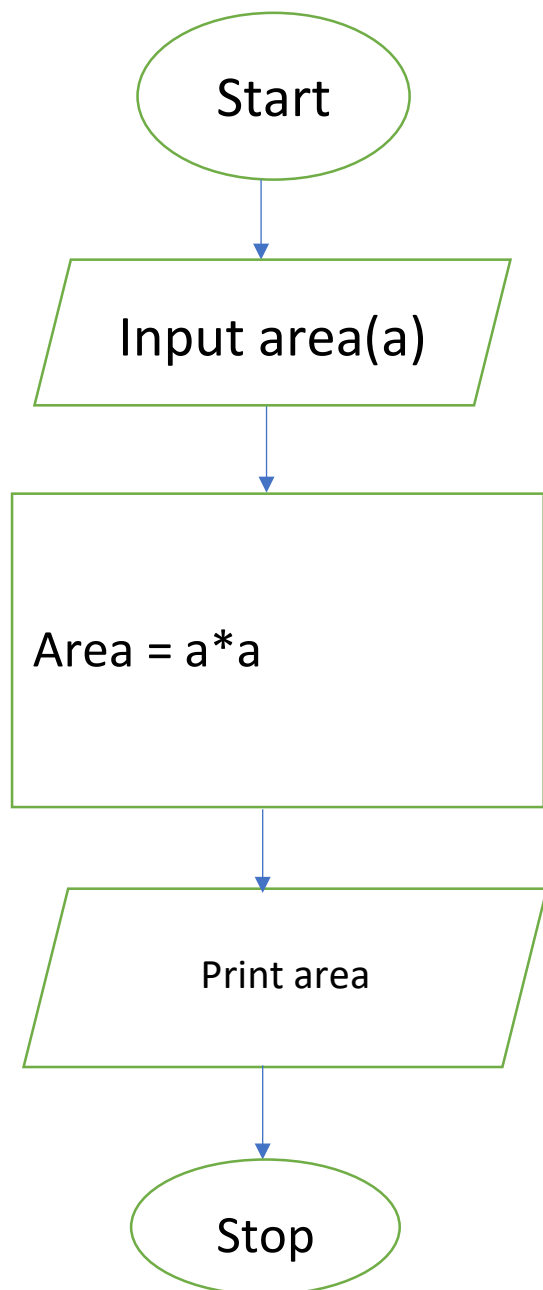

A) Algorithm

Step 1. Start Step 2. Read side_length (a) Step 3. Compute
 $\text{area} = a \times a$ (or a^2) Step 4. Display/Print the area Step 5. Stop

B) Python Code :

```
a= int(input()) area  
= a*a print(area)
```

C) flowchart :

D) Output image :

The screenshot displays a coding environment with the following components:

- Header:** Logo "CODETANTRA" and a "Home" link on the left. On the right, a user profile "kanhaiya.tyagi.batch2025@sitnagpur.siu.edu.in" and a "Logout" button.
- Problem Statement (Left Panel):**
 - 1.1.3. Calculate Area of the Square**
 - Write a Python program that prompts the user to enter the *side_length* of a square and computes the area of the square.**
 - Formula:**
 - $\text{Area} = \text{side_length}^2$
 - Input Format:**
 - The input is a positive integer value that represents the *side_length* of the square.
 - Output Format:**
 - The output is a positive integer value that represents the area of the square.
 - Sample Test Cases** (button)
- Code Editor (Middle Panel):**
 - AreaSqua...**
 - Code:

```
1 a=int(input())
2 area=a*a
3 print(area)
4
5
6
7
8
```
- Test Results (Right Panel):**
 - Average time:** 0.003 s (2.50 ms)
 - Maximum time:** 0.004 s (4.00 ms)
 - 2 out of 2 shown test case(s) passed**
 - 2 out of 2 hidden test case(s) passed**
 - Test case 1 (4 ms):**

Expected output	Actual output
5	5
25	25
 - Test case 2 (2 ms):** (collapsed)
- Footer:** Navigation buttons: < Prev, Reset, Submit, Next >
